E

No matter whether they are in the city, on a country road or a motorway – car drivers are always confronted with a number of solid or gaseous contaminants in the vehicle interior. At the best, this comes in the form of simple smell pollution, but much more often there is a health risk too.
For this reason most modern motor vehicles are already fitted with reliable filter protection when they leave the factory. Only regular exchange, however, guarantees unrestricted filtering results. With CORTECO micronAir@ cabin air filters, you ensure that your customers get only the best filters quality and reliable protection against contaminants in the vehicle interior through state-of-the-art fleece technology. They can be used as particle filter systems for solid matter or as a combi solution for all-round protection against solid matter, gases and smells.

I

In qualunque posto voi siate, in città, su una strada di campagna o su un'autostrada, siete sempre in contatto diretto con l'inquinamento dell'aria, sottoforma di gas o particelle, che indirettamente si può introdurre nell'abitacolo del vostro veicolo. Proprio per questo la maggior parte dei veicoli moderni è dotata già all'origine di un filtro aria abitacolo. I migliori risultati di filtrazione sono garantiti dalla sostituzione regolare di questo filtro. Con i filtri aria abitacolo CORTECO micronAir@ garantite ai vostri clienti una migliore qualità di filtrazione e una protezione efficace dalle sostanze inquinanti, necessarie per assicurare ai passeggeri aria pulita all'interno dell'abitacolo. E' possibile scegliere fra un sistema di filtrazione particellare contro le sostanze solide, oppure un sistema di filtrazione di tipo combinato per bloccare anche gas e odori sgradevoli.

PRODUCT INFORMATION

INFORMAZIONE PRODOTTI

THE CABIN AIR FILTER AS A BARRIER AGAINST BAD AIR

With micronAir® cabin air filters, CORTECO offers its customers only OEM quality products that protect effectively against pollutants and smells inside the car. micronAir® is a trademark of Freudenberg, the inventors of nonwoven technology and leaders in the innovation of filter solutions for car interiors. The majority of all new vehicles are fitted with micronAir®. As market leader we supply the complete product range, are a reliable development partner to the automotive industry and a creative force in the innovation process. In the brand-independent aftermarket, micronAir® is a reliable brand that dealers, garages and drivers trust.

OFFER YOUR CUSTOMERS SAFETY AND COMFORT

Health: Particulate filters protect against **pollen, dust and dirt** in the air. Combined filters offer additional protection against **traffic and industrial emissions** and irritant **ozone gas**. For allergy and asthma sufferers, high grade cabin air filters offer protection against pollen inside the vehicle.

Comfort: The micronAir® combined filter protects against **obnoxious smells**, e.g. from farm fertilisers, sewage treatment plants, anti-freeze and cleaning agents in windscreen washer fluid etc.

Hygiene: Cabin air filters act against the accumulation of dirt on the inside of windows and in the heating, ventilation and air conditioning systems.

Safety: micronAir® contributes to ensuring a **clear view** and heightened wellbeing for the driver and passengers, thereby also improving driving safety.

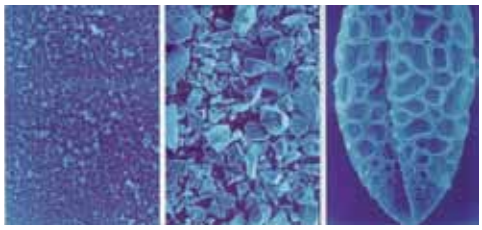
Vehicle: Regularly changing filters protects heating, ventilation and air conditioning systems and can **lengthen their service life**.

micronAir® offers two types of filter:

The **micronAir® combined** filter **also** protects against harmful gases, unpleasant smells and reduces ozone pollution.

The **micronAir® particulate** filter protects against pollen, fine dust and particles that can be breathed in.

micronAir® protects against various particulates:



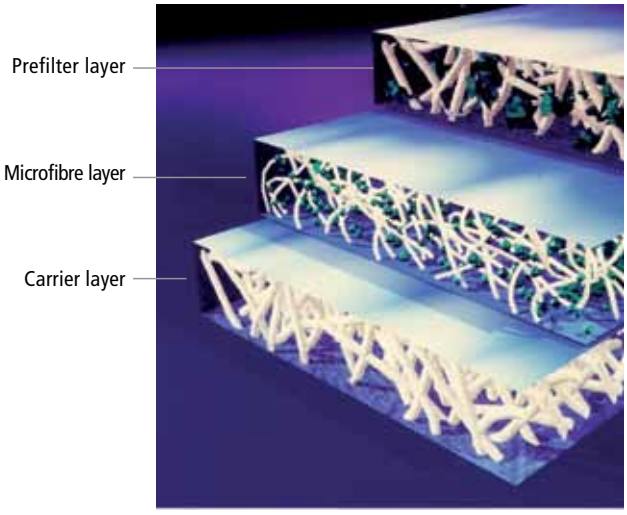
Soot | Exhaust gases | Pollen

QUALITY FROM THE LEADING OEM

The reliable micronAir® filters are developed, produced and supplied to automotive manufacturers worldwide by Freudenberg, which is why Freudenberg is the market leader in cabin air filters: more than half of all new cars are fitted with a micronAir® cabin air filter. With a range of more than 600 vehicle applications, garages can find the right OEM quality cabin air filter for almost every type of vehicle.

The benefits of micronAir® for you:
- **Superior results due to latest filter technology using multilayer filter medium**
- **OEM quality, acclaimed by TÜV and ÖKO-TEST**
- **Perfect fit matched to the vehicle**
- **Satisfied customers and growing salese**

Talk to our customer service.



FILTER TECHNOLOGY - NATURALLY FROM THE MARKET LEADER

The micronAir® particulate and combined filters consist of a multilayer filter medium. This is a highly effective separator and is enclosed by a prefilter and a carrier layer (see illustration). The arrangement of the different layers is progressive, the fibre fineness and density increasing toward the clean air side. The combined filters are provided with an extra absorption layer. All micronAir® cabin air filters are fitted with a nonwoven filter medium and are therefore much more robust and moisture resistant than paper filters. This guarantees high filter performance and long service life. As cabin air filters are subject to wear depending on use and material, they should be replaced at least once a year or after 15,000 to 30,000 km by a micronAir® OEM quality filter.

CORTECO-micronAir® FILTER QUALITY FOR A FIRST-CLASS DRIVING EXPERIENCE

You are always in for a good drive with micronAir® cabin air filters from CORTECO.
Our quality advantages at a glance:

1. CORTECO cabin air filters are the result of state-of-the-art fleece technology which is the basis for a high level of effectiveness when filtering out contaminants.
2. CORTECO cabin air filters are adjusted precisely to the various vehicle types in regard to their performance and effectiveness.
3. CORTECO cabin air filters are subjected to the most stringent quality control tests in all production phases.
4. CORTECO cabin air filters protect the vehicle's heating and air conditioning system thanks to their high level of effectiveness.
5. CORTECO cabin air filters ensure optimum installation handling with every vehicle type thanks to their exact fitting precision.
6. CORTECO cabin air filters protect the vehicle occupants against solid matter, particles and gases, thereby prevent them from health hazards.

I FILTRI ARIA ABITACOLO SONO UNA BARRIERA CONTRO L'ARIA INQUINATA

Con i filtri aria abitacolo micronAir®, CORTECO offre ai suoi clienti solo prodotti di qualità OEM che proteggono efficacemente l'interno delle auto dalle sostanze inquinanti e dai cattivi odori. micronAir® è un marchio Freudenberg, l'inventore della tecnologia dei Tessuti-Non-Tessuti e il leader mondiale per l'Innovazione Tecnica per la filtrazione dell'aria dell'abitacolo delle autovetture.
La maggior parte dei nuovi veicoli è equipaggiata con un filtro micronAir®. Freudenberg, quale leader di mercato, oltre a fornire una gamma completa di applicazioni, è partner affidabile, innovativo e creativo per l'industria automobilistica durante lo sviluppo di tutti i nuovi progetti OEM. Nel mercato indipendente dell'Aftermarket, micronAir® è un marchio che gode di ottima reputazione, di cui rivenditori, officine e automobilisti possono fidarsi.

OFFRITE AI VOSTRI CLIENTI SICUREZZA E COMFORT

Salute: I filtri particellari proteggono da **polline, polvere e sporcizia** presenti nell'aria. I filtri combinati offrono un'ulteriore protezione contro le **emissioni** dovute al **traffico**, agli **scarichi industriali** e contro il **gas ozono**, che è particolarmente irritante. Per chi soffre di allergia e di asma, i filtri aria abitacolo di alta qualità impediscono ai pollini di depositarsi all'interno del veicolo.

Comfort: I filtri combinati con carboni attivi proteggono dagli **odori sgradevoli**, come per esempio quelli provocati dai fertilizzanti, dai concimi usati per le piante, dagli agenti pulenti e antigelo presenti nel liquido detergente per il parabrezza ecc…

Igiene: I filtri aria abitacolo micronAir® prevengono l'**accumulo di sporco** all'interno dei finestrini, nell'impianto di riscaldamento, ventilazione e condizionamento.

Sicurezza: micronAir® contribuisce ad assicurare una **migliore visibilità** ed accresce il benessere del guidatore e dei passeggeri, migliorando la sicurezza di guida.

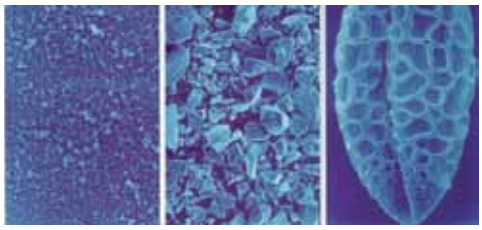
Veicolo: Una sostituzione periodica dei filtri aiuta a mantenere l'impianto di riscaldamento, ventilazione e condizionamento in condizioni ottimali, **prolungandone la durata.**

micronAir® offre due tipi di filtro:

Il filtro **combinato con carboni attivi micronAir®** protegge anche dai gas nocivi, dagli odori sgradevoli e riduce l'inquinamento da ozono.

Il filtro **particellare micronAir®** protegge dai pollini, dalle polveri sottili e da particelle respirabili presenti nell'aria.

micronAir® protegge da particelle di vario tipo



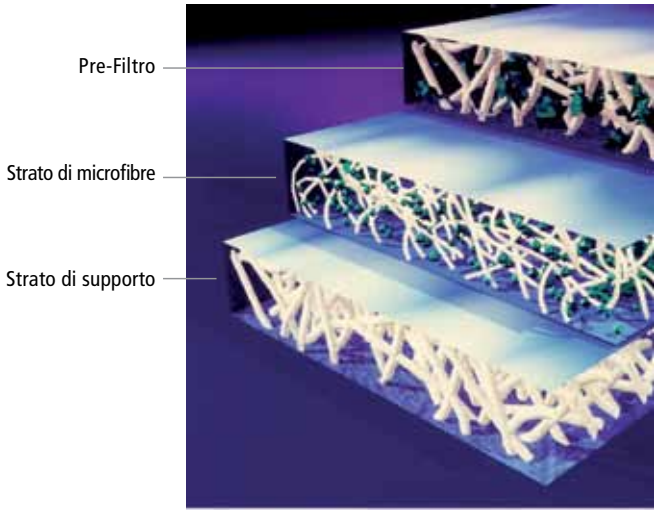
Fuliggine | Gas di scarico | Polline

QUALITÀ DAL FORNITORE OEM

I filtri aria abitacolo micronAir® sono sviluppati, prodotti e distribuiti alle Case Auto di tutto il mondo da Freudenberg che è pertanto il leader mondiale della filtrazione aria abitacolo: ben oltre la metà delle nuove autovetture nasce in origine con un filtro aria abitacolo micronAir®. Con una gamma di oltre 600 applicazioni automotive, le officine possono trovare l'esatto filtro di qualità OEM per praticamente tutti i tipi di veicolo.

I vantaggi micronAir® per te:
- **Risultati eccellenti grazie alla più avanzata tecnologia di prodotto, con media filtrante multistrato**
- **Qualità OEM, confermata da TÜV e ÖKO-TEST**
- **Montaggio perfetto**
- **Clienti soddisfatti e incremento delle vendite**

Per informazioni rivolgiti al nostro Servizio Clienti.



TECNOLOGIA FILTRANTE, NATURALMENTE DAL LEADER DI MERCATO

I filtri particellari e combinati con carboni attivi micronAir® sono realizzati con una media filtrante multistrato. Questo è sostanzialmente un separatore di particelle ad alta efficienza, compreso tra uno strato di prefiltro e uno strato di supporto (vedi illustrazione).
La disposizione dei diversi strati è progressiva, ovvero con fibre più fini e dense nella direzione del lato aria pulita. I filtri combinati hanno in aggiunta uno strato di carboni attivi per l'adsorzione dei gas. I filtri abitacolo micronAir® sono dotati di una media filtrante in tessuto-non-tessuto, strutturalmente molto più robusto e resistente all'umidità rispetto ai filtri con media filtrante in carta. Questo assicura altissime prestazioni di filtrazione e lunga durata di esercizio. Dal momento che i filtri aria abitacolo sono soggetti ad intasamento, secondo le condizioni atmosferiche e le modalità di utilizzo della vettura, così come per la qualità intrinseca del prodotto, dovrebbero essere sostituiti almeno una volta all'anno con un filtro micronAir® che offre la qualità originale di primo equipaggiamento.

LA QUALITÀ DEI FILTRI CORTECO-micronAir® PER UN PIACERE DI GUIDA SENZA CONFRONTI

Per guidare sempre in un ambiente sano, date un'occhiata ai nostri vantaggi.
I filtri aria abitacolo CORTECO micronAir®:

1. sono il prodotto risultante del continuo progresso nella tecnologia del tessuto-non-tessuto, che è alla base del loro elevato potere filtrante dalle sostanze inquinanti;
2. sono creati appositamente per ogni tipo di veicolo, in considerazione delle loro prestazioni e della loro efficacia;
3. sono sottoposti ai più severi test di controllo qualità in tutte le fasi della loro produzione;
4. grazie al loro elevato grado di efficacia, proteggono l'impianto di riscaldamento e di climatizzazione del veicolo;
5. assicurano un'installazione perfetta su ogni tipo di veicolo grazie alla loro precisione di montaggio;
6. proteggono i passeggeri dalle sostanze inquinanti solide, dal pulviscolo e dai gas, eliminando quindi potenziali rischi per la salute.
